

Kirana Moore

✉ kiranamoore14@gmail.com  [Kirana Moore](#)  kiranamoore.com

SKILLS

XR Development: Adobe Creative Cloud, C++, Javascript, Meta Spark Studio, Effect House, Lens Studio, Unity.
3D Design: Blender, KeyShot, Marvelous Designer, Protopie, Revit, Rhinoceros 3D, SketchUp.

EDUCATION

University of Southern California

Candidate for B.S. in Arts, Technology, and the Business of Innovation (GPA: 3.82/4.0)

Los Angeles, CA

May 2026

- * **Coursework:** Unity and C# for XR Applications, 3D Visualization for Fashion and Wearables, Creating Experiences, Extended Reality Development, Architectural Design

EXPERIENCE

Ernst & Young

August 2025 - December 2025

Consultant

Los Angeles, CA

- * Ideated, designed, and prototyped spatial solutions for Ernst & Young, facilitating innovation and collaboration through adaptable layouts and immersive design strategies.
- * Developed architectural concepts in SketchUp and produced detailed 3D models and renders in Rhinoceros 3D, resulting in client-ready visualizations that communicated design intent.

Hewlett-Packard (HP)

May 2025 – August 2025

3D Artist / Augmented Reality Developer

Remote

- * Created high-quality, low-poly 3D assets by reducing a Cloud 3 headset model's mesh complexity by 99.7% (6M+ to 15k triangles) via Blender-based optimization, PBR texturing, lighting, and ray-traced rendering, enabling real-time product visualization for web and AR brand experiences ([demo](#)).
- * Modeled, textured, lit, and optimized three sets of HyperX headset accessory assets, reducing CAD models from 12M to 30k triangles using Quad Remesher and Blender's Edit Mode, baking normal and diffuse maps for real-time AR customization and web product viewers ([demo](#)).
- * Developed a web-based AR experience for real-time product customization with HX3D accessories, collaborating with marketing/UI teams in Figma and Photoshop to integrate Unity and Lens Studio assets, earning HyperX CEO's feedback and driving AR investment interest for e-commerce and brand experiences.

HyperX

August 2024 – May 2025

Augmented Reality Developer

Fountain Valley, CA

- * Created poseable and animated real-time low-poly 3D Cloud 3 Gaming Headset model, optimizing geometry in Cinema 4D, texturing in Adobe Substance Painter, and animating, lighting, and rendering in Blender for use in high-fidelity AR prototypes in Lens Studio, supporting product visualization and immersive brand experiences.
- * Developed two Lens Studio AR experiences, including interactive packaging ([demo](#)) and QR code-triggered AR manual ([demo](#)), increasing buyer confidence and enabling paperless product education through user-centered design, earning stakeholder support for future AR development in marketing campaigns.

Honda

February 2025 – March 2025

Unity Developer

Los Angeles, CA

- * Developed a Unity demo for Mosaic by sourcing and integrating 3D assets with adaptive digital panels and responsive UI, resulting in a story-driven prototype that communicated Honda's future mobility vision to stakeholders. ([demo](#)).
- * Illustrated storyboards and translated user flows into interactive experiences, resulting in a prototype that emphasized personalization, emotional well-being, and community for Gen Z users.

Hewlett-Packard (HP)

May 2024 – August 2024

3D Artist / Augmented Reality Developer

Remote

- * Created low-poly 3D models for Alloy Origins 60, Pulsefire Haste Wireless, and Haste 2 Core Wireless, reducing CAD geometry from 2M to 10K (99.5%), 600K to 40K (93%), and 700K to 40K (94%) triangles by building a Rhinoceros 3D polygon optimization pipeline with the ReduceMesh command, fixing the mesh, texturing, lighting, and rendering in Adobe Substance Painter.
- * Optimized and animated low-poly Alloy Origins PBT keyboard 3D model for interactive packaging AR experience, reducing triangle faces from 3M to 11K (99.6% reduction) through Rhinoceros 3D mesh optimization, baking textures in Adobe Substance Painter, and rigging, animating, ray-tracing, and rendering in Blender to support product visualization and marketing campaigns.
- * Built product AR viewer in **Meta Spark Studio**, earning stakeholder buy-in for continued AR development ([demo](#)).

USC Bookstores

August 2022 - May 2026

3D Artist / Augmented Reality Developer

Remote

- * Maintained accurate architectural drawings and 3D models of the USC campus bookstore, ensuring ADA compliance and design consistency by regularly revising plans and elevations in Rhinoceros 3D and Adobe Illustrator.
- * Designed circulation plans, barricade layouts, and spatial configurations for high-profile guest appearances and special events, resulting in safe, engaging, and adaptable experiences for visitors and stakeholders.
- * Developed a detailed 3D model and floor plans of the USC Bookstore's off-campus warehouse, including numbered shelving systems, improving inventory management and operational accessibility.
- * Supervised a team of architectural designers to maintain and organize floor plans and 3D assets, establishing a standardized digital archive that streamlined access and improved collaboration.

Studio W Architects

June 2023 - August 2023

Architectural Design Intern

San Jose, CA

- * Produced 3D models and architectural drawings in Revit for California public school renovation projects, including detailed concrete masonry fence and wall base designs.
- * Modeled portable classrooms and existing school sites to support construction planning, such as the integration of a new fire lane.
- * Collaborated on architectural drawings in AutoCAD and used SketchUp for concept development, ensuring accuracy and alignment across design phases.
