Education

University of Southern California, Iovine and Young Academy — Los Angeles, CA
B.S. Arts, Technology, and the Business of Innovation (GPA: 3.82/4.0) — *Dec 2026*
- **Focus**: Product Design, Web Design, UX Research

Experience

Nalana (nalana.io) — October 2026 – Present
Project Manager — *Los Angeles, CA*
- Led go-to-market and brand messaging for Nalana, an AI-native 3D creation app, coordinating a cross-functional team on weekly deliverables including market validation and accelerator application packets.
- Drove Reddit community outreach campaign, drafting 30 technical comments and 4 original posts and publishing 21 comments to validate positioning with 3D designers and makers.
- Authored the market validation strategy and messaging and direction strategy, translating technical product capabilities into clear, human-facing brand voice.

ZuZu — March 2026 – August 2026
Visual Design Lead — *Remote*
- Led the UI design system and component architecture for an early-stage SaaS platform, creating scalable Figma components, design tokens, responsive Auto Layout patterns, and interaction states across web and mobile.
- Designed and rapidly prototyped high-fidelity product experiences in Figma and Lovable, translating product requirements into interactive flows and implementation-ready UI in close partnership with engineering.
- Built the company's visual identity system from the ground up, including its logo, custom iconography, brand guidelines, investor presentations, and marketing assets, establishing a cohesive experience across product and brand.

EY (Ernst & Young) — September 2025 – December 2025
Product Designer — *Los Angeles, CA*
- Designed modular workflow systems for enterprise innovation programs, translating complex facilitation logic into scalable interaction frameworks.
- Synthesized qualitative research using AI-assisted clustering and pattern extraction tools, accelerating insight generation while maintaining rigorous documentation.
- Created structured design artifacts (journey maps, system diagrams, feature specs) supporting cross-functional implementation.

HP Inc. (HyperX) — May 2025 – August 2025
Product Designer — *Remote*
- Led end-to-end UX for HX3D, an interactive retail-to-DTC commerce workflow integrating QR entry, AR visualization, and checkout logic within strict technical constraints.
- Architected feature flows balancing marketing, engineering, and 3D production systems; documented lifecycle requirements and performance limits (8MB cap; less than 60k triangles).
- Presented structured product roadmap and live demos to HyperX and HP executives, influencing continued experiential commerce investment.

Honda — February 2025 – March 2025
Product Designer — *Los Angeles, CA*
- Designed complex multi-state interaction systems for a future autonomous mobility platform, structuring opt-in communal workflows and adaptive UX states.
- Iterated through four stakeholder reviews, refining information architecture and interaction logic.

ARUP — August 2024 – December 2024
Product Designer — *Los Angeles, CA*
- Led research and system modeling for a modular urban activation platform, defining repeatable infrastructure workflows across multiple stakeholders.
- Produced scalable visual and systems documentation communicating platform logic to senior consultants.

HP Inc. (HyperX) — May 2024 – August 2024
Product Designer — *Fountain Valley, CA*
- Developed AI-assisted interactive product education systems replacing static manuals, projected to save $100K annually at 10M-unit scale.
- Optimized production assets and collaborated with frontend-aware teams to integrate interactive modules into digital campaigns.

Skills

Adobe Creative Suite, Claude, Cursor, Figma, FigJam, Git/GitHub, GPT-4, HTML, CSS, JavaScript, Jira, MidJourney, Protopie, Python, Vercel, Vizcom
